Introduction:

This report contains brief explanations of how financial relations between the Federation and Länder are structured, as stipulated by the German constitution and ordinary law; an overview of the financial resources of the different levels of government in Germany; and an overview of key co-financing arrangements between the Federation and the Länder.

1. Allocation of state functions between the Federation and Länder (Article 30 of the Basic Law)

In Germany, the Länder (the 16 states that make up the Federal Republic of Germany) are generally responsible for carrying out state functions (including legislation) and executing the laws. This is stipulated by the country's constitution, called the *Grundgesetz* or Basic Law (cf. Articles 30, 70 and 83 of the Basic Law). The Federation is authorised to perform state functions only where the Basic Law expressly or implicitly empowers it to do so.

1.1 Legislative powers

The legislative powers of the Federation are set out mainly in Article 70 et seqq. of the Basic Law and, with regard to taxation in particular, in Article 105 of the Basic Law. The Federation has both exclusive power to legislate on certain matters (cf. Articles 71, 73 and 105 paragraph (1) of the Basic Law) as well as concurrent powers that are shared with the Länder (cf. Articles 72, 74 and 105 paragraph (2) of the Basic Law). In areas where the Federation has exclusive rights to legislate, the Länder have power to legislate only when and to the extent that they are expressly authorised to do so by a federal law. In areas where the Federation and Länder share concurrent legislative powers, however, the Länder have the authority to legislate as long as and to the extent that the Federation has not exercised its legislative power by enacting a law.

The Federation has exclusive legislative powers in areas of national importance (such as matters relating to identity documents and the registration of residents; the protection of cultural assets; and laws on arms and explosives). The Länder have exclusive legislative powers in areas that are regulated at the regional level (such as the penal system, the right of assembly, and civil servants' pay and pensions).

In practice, legislative powers have gravitated largely towards the Federation. The main reason for this is the great extent to which the Federation has exercised its concurrent legislative powers. Over the years, the federal legislature – predominantly with the agreement of the Länder or at their request – has exercised its right to legislate on a wide variety of fundamental matters to preserve legal and economic unity in the national interest and equivalent living conditions throughout the country.

Changes to the law in 1994 established more restrictive criteria on the exercise of concurrent legislative powers by the Federation (the Basic Law was amended such that concurrent powers may be exercised by the Federation only in cases where there is a "necessity" rather than when there is a perceived "need"). At the same time, federal laws may now be adopted that allow federal legislation to be superseded by Länder law if the federal legislation is no longer necessary (this is set out in Article 72 paragraph (4) of the Basic Law and the transitional arrangement in Article 125a paragraph (2) of the Basic Law).

In some ways, the 1994 legislative amendments also make it easier for the Federation to exercise its concurrent legislative powers, because reviews to determine whether federal legislation is necessary are now required only in certain policy areas (such as public welfare benefits, the economy, and road traffic). In return, the Länder have the power to pass laws that diverge from federal legislation in certain policy fields (such as admissions to higher education, university degree requirements, and some areas of environmental law). This means that concurrent legislative powers can take one of three different forms: first, there are policy areas that require a review to determine whether federal legislation is

necessary; second, there are policy areas where no review to determine the necessity for federal legislation is required; and third, there are policy areas where no review to determine the necessity for federal legislation is required but where the Länder are permitted to pass laws that diverge from federal legislation.

The Federation has the exclusive power to pass legislation governing customs duties and financial monopolies (cf. Article 105 paragraph (1) of the Basic Law). With regard to other taxes, the Federation has concurrent legislative powers (cf. Article 105 paragraph (2) of the Basic Law) over taxes whose revenue flows entirely or partly to the Federation. This is the case, for example, with the three "joint taxes", i.e. income tax, corporation tax and value added tax, whose revenue is shared between the Federation and the Länder (Article 106 paragraph (3) sentence 1 of the Basic Law). The Federation also has concurrent legislative powers over taxes for which federal-level legislation is deemed necessary in accordance with the criteria stipulated in Article 72 paragraph (2) of the Basic Law. Since there was no academic consensus regarding the Federation's legislative powers over real property tax, which accrues to the Länder (Article 6 paragraph (2) no 3 of the Basic Law), an amendment to the Basic Law was adopted in 2019 that assigns the Federation concurrent legislative powers over real property tax, regardless of the criteria stipulated in Article 72 paragraph (2) of the Basic Law (Article 105 paragraph (2) sentence 1 of the Basic Law). At the same time, the Länder were given the option, via an addition to Article 72 paragraph 3 of the Basic Law, of issuing Land legislation that deviates from federal legislation (Article 72 paragraph (3) no 7 of the Basic Law).

To ensure legal and economic consistency on a nationwide basis, the Federation has made extensive use of its concurrent legislative powers in the area of taxation. This means that the Länder (together with local authorities) retain the power to levy taxes mainly in the form of local excise duties, as long as such duties are not equivalent to taxes governed by federal law (cf. Article 105 paragraph (2a) sentence 1 of the Basic Law). In addition, the Länder have the

exclusive power to pass legislation on church tax (cf. Article 140 of the Basic Law in conjunction with Article 137 paragraph (6) of the Weimar Constitution) and to determine the tax rate for real property transfer tax (cf. Article 105 paragraph (2a) sentence 2 of the Basic Law). Local authorities have the right to determine the multipliers (*Hebesatz*) that are applied to the basic rates of real property tax and trade tax (cf. Article 106 paragraph (6) sentence 2 of the Basic Law) and that influence the amount of revenue collected by local authorities.

The Länder participate in the legislative activity of the federal government via the Bundesrat (the upper house of the federal parliament). The Länder have the most influence over the legislative process in cases where, according to the Basic Law, a federal law requires the Bundesrat's consent in order to be enacted. In the area of tax legislation, Bundesrat consent is required if all or part of the tax revenue from a particular tax accrues to the Länder or to the local authorities (cf. Article 105 paragraph (3) of the Basic Law). The latter applies for example to trade tax and real property tax (cf. Article 106 paragraph (6) sentence 1 of the Basic Law).

1.2 Administrative responsibilities

In contrast to the allocation of legislative powers, the responsibility for (a) executing laws and (b) administrative activities not regulated by law lies predominantly with the Länder. This is particularly true for federal laws that the Länder execute in their own right (cf. Article 83 of the Basic Law). In exceptional cases, the Basic Law stipulates that the Länder execute federal laws on behalf of the Federation. Where the Basic Law requires the Länder to do so, this is called "obligatory execution on federal commission" and occurs for example in the case of taxes accruing in whole or in part to the Federation (cf. Article 108 paragraph (3) sentence 1 of the Basic Law). Where the Basic Law enables the Federation to task the Länder with executing a law on behalf of the Federation, this is called "optional execution on federal commission" and occurs for example in the case of aviation administration (cf. Article 87d

paragraph (2) of the Basic Law). In contrast to laws that the Länder execute on their own behalf, the Federation has extended supervisory powers when it comes to laws that the Länder execute on the Federation's behalf. These powers encompass legal oversight as well as the authority to ensure that the laws are executed appropriately (cf. Article 84 paragraph (3) sentence 1 and Article 85 paragraph (4) sentence 1 of the Basic Law).

The Federation itself executes laws – through its own administrative authorities or through federal corporations or public law institutions – in specific areas that are stipulated in the Basic Law. Here too, it is possible to distinguish between functions that the Federation is required to carry out through its own administrative authorities (such as the foreign service; cf. Article 87 paragraph (1) sentence 1 of the Basic Law) and functions where this is optional (such as federal border police authorities; cf. Article 87 paragraph (1) sentence 2 of the Basic Law). Article 87 paragraph (3) sentence 1 of the Basic Law also contains an important instance of the latter. Under this provision, autonomous federal higher authorities as well as new federal corporations and institutions under public law may be established by federal law for matters over which the Federation has legislative power. Customs duties, financial monopolies, excise duties regulated by federal law (including import VAT), motor vehicle tax, other transaction taxes related to motorised means of transport, and the levies applicable within the framework of the European Union are administered by federal revenue authorities - in other words, by federal administrative authorities with their own administrative substructure (cf. Article 108 paragraph (1) sentence 1 and Article 87 paragraph (1) sentence 1 of the Basic Law).

2. Allocation of financial responsibility between the Federation and the Länder

2.1 Basic principles

According to the Basic Law, each level of government is in principle responsible for financing its own expenditures. The responsibility for financing a state function falls to the government level that bears administrative responsibility for that function as laid down in the Basic Law (Article 104a paragraph (1) of the Basic Law). The basic link between administrative and financial responsibility contained in this burden-sharing rule means that financial responsibility generally lies with the Länder, given the fact that the Länder are generally responsible for executing legislation. The Federation may finance only those tasks that it is explicitly or implicitly responsible for administering under the Basic Law. The principle that administrative responsibility engenders financial responsibility is confirmed by the Basic Law, which stipulates that the Federation and Länder must finance the administrative expenditures incurred by their respective authorities. Administrative expenditures (costs for administrative staff and administrative bodies) must therefore be distinguished from what are referred to as "purpose-related expenditures" - that is, spending that serves to achieve the purpose of the task in question.

2.2 Exceptions

There are, however, exceptions to the strict division of financial responsibilities between the Federation and the Länder. Because of the Federation's responsibility for the state and economy as a whole, the Basic Law permits the Federation to help finance Länder tasks in the form of co-financing. These joint financing arrangements were partly restructured and modified in the course of the 2006 and 2009 federal reforms, the 2017 reorganisation of financial relations between the Federation and the Länder, and further adjustments enacted in 2015 and 2019.

2.2.1 Joint tasks

Where certain functions performed by the Länder are of considerable importance for the future development of the country as a whole, the Basic Law allows the Federation to participate in the implementation and financing of such functions if this is necessary for the improvement of living conditions (cf. Article 91a paragraph (1) of the Basic Law). Such functions are referred to as "joint tasks". The Federation may participate in the following areas, which are specifically and exhaustively designated in the Basic Law:

- Improvement of regional economic structures
- Improvement of agricultural structures and coastal protection

For tasks relating to the improvement of regional economic structures, the Federation provides half of the funding. For tasks relating to the improvement of agricultural structures and coastal protection, the Federation provides at least half of the funding in each Land, although all Länder must receive a uniform share of federal funding.

The details of the coordination between the Federation and Länder must be specified by means of a federal law that requires the approval of the Bundesrat (cf. Article 91a paragraph (2) of the Basic Law). Through this joint coordination, the Federation is able to influence the way in which such activities are carried out in the Länder.

While the Basic Law requires the Federation and Länder to work together on the joint tasks mentioned above in cases where the preconditions are met, it also provides for the option to cooperate in the areas of science and research and in international comparisons of educational systems (Article 91b of the Basic Law).

Under the revised version of Article 91b paragraph (1) of the Basic Law, which took effect in 2015, the Federation and Länder may conclude agreements to cooperate in supporting science, research and teaching in cases that have relevance for the country as a whole. This greatly expands the opportunities for cooperation between the Federation and Länder in the areas of science and research. The new rules permit long-term support for both higher education institutions as well as non-university research centres on the basis of agreements between the Federation and the Länder. Agreements targeting higher education institutions require the consent of all of the Länder, although this does not apply to agreements on the construction of research buildings including large-scale equipment.

Under Article 91b paragraph (2) of the Basic Law, the Federation and Länder may cooperate on measures to assess the performance of the German education system in comparison with other countries, and on related reports and recommendations.

In these areas of activity, the distribution of costs is regulated in each respective agreement between the Federation and Länder and can thus be negotiated by the parties involved.

Furthermore, as part of the 2009 federal reforms, two provisions on administrative cooperation were added to the Basic Law.

First, Article 91c of the Basic Law permits the Federation and Länder to collaborate on IT systems that are necessary for the performance of state functions and to adopt joint interoperability and security standards for public administration. It also provides for the Federation to establish and operate a communications network connecting federal and Länder authorities. The resulting improvement in public sector IT infrastructure is intended to help make the public administration faster, more efficient and more cost-effective. The specifics of this collaboration are defined in a treaty between the Federation and the Länder negotiated within the Commission on Federal Reform. The details regarding the interconnecting network between federal and Länder authorities are laid down in an IT Network Act (IT-Netz-Gesetz) adopted by the Bundestag and Bundesrat as part of the federal reform process. In addition, as part of the 2017 reorganisation of financial relations between the Federation and the Länder, the Federation took on legislative powers that will enable it to establish an obligatory, nationwide joint portal that will give individuals and companies access to online public administration services at the federal and Land level.

Second, Article 91d of the Basic Law grants the Länder and the Federation the option of carrying out comparative studies to assess and improve the performance of their administrative bodies (a process referred to as benchmarking). This bench-marking aims to improve the performance of public administration as a whole by adding transparency to the services, quality and costs of administrative bodies, thereby shedding light on ways to enhance their effectiveness and efficiency.

The performance of tasks by employment agencies and local authorities in connection with the provision of basic benefits for job-seekers is constitutionally enshrined under Article 91e, which was added to the Basic Law in 2010.

2.2.2 Financial assistance

The Basic Law also gives the Federation the option of providing co-financing in the form of financial assistance. Under Article 104b paragraph (1) of the Basic Law, the Federation may, in areas where it holds legislative powers, grant financial assistance to the Länder to promote particularly important investments by the Länder and local authorities that are necessary to

- avert a disturbance of the overall economic equilibrium,
- balance out economic disparities in Germany, or
- promote economic growth.

This means that financial assistance must aim either (a) to have an impact on growth (the first option above) or (b) to achieve structural changes that will have a positive effect on a region's economy or on the national economy (the second and third options above). At the same time, such investments must (a) be targeted towards functions performed by the Länder and (b) have particular relevance for the country as a whole. One exception to the above-cited condition that the Federation may grant financial assistance only in areas where it holds legislative powers is laid down in Article 104b paragraph (1) sentence 2 of the Basic Law. This provision expands the Federation's powers by permitting it to grant financial assistance in the event of natural disasters or extraordinary emergencies that are beyond the control of government and that have a major adverse impact on public finances, even if the Federation does not have legislative powers concerning the matter.

The Act Amending the Basic Law (*Gesetz zur Änderung des Grundgesetzes*), which took effect on 4 April 2019, further expands the Federation's options for providing financial assistance to the Länder for the purpose of boosting investment in politically important areas.

Article 104c of the Basic Law, which was added in 2017 as part of the reorganisation of financial relations between the Federation and the Länder, allows the Federation to provide financial assistance for the purpose of investing in education infrastructure, as long as such investments are deemed relevant for Germany as a whole. Originally, this power extended only to the provision of financial assistance to local authorities with inadequate financial resources. This constraint has now been lifted. This means that the Federation now has the ability to support such investment nationwide on the basis of Article 104c of the Basic Law. Wording was also added to this provision to the effect that such federal financial assistance must aim to enhance the efficiency of local education infrastructure. In addition, the Federation's powers to provide financial assistance were extended to cover special expenditures of a temporary nature that are directly related to such investments. This rule is an exception; in general, federal financial assistance can be used to promote investment only in fixed assets. Any such special non-investment spending must be used for special measures that are necessary for fulfilling the purpose of the investment (eligible spending could include, for example, costs to build a system administration tool or to train instructors as part of an overall programme for investing in digital education infrastructure). Financial assistance in accordance with Article 104c of the Basic Law cannot be used to cover administrative costs related to an investment programme or general follow-up costs of investments. The expanded provisions contained in Article 104c of the Basic Law have no effect on the authority of the Länder over the functions and financing of the education system as a key feature of their autonomy in cultural and educational affairs.

A new article (Article 104d) has been added to the Basic Law that allows the Federation to provide financial assistance to the Länder for the purpose of promoting Land and local authority investment in social housing, as long as such investments are deemed relevant for Germany as a whole. In its statement of legislative intent for Article 104d, the federal government asserted that it is necessary to

provide targeted financial assistance in order to tackle housing shortages and rising rents.

The special rules contained in Articles 104c and 104d of the Basic Law deviate from the general rule (stipulated in Article 104b of the Basic Law) that federal financial assistance is permissible only in those areas where the Federation holds legislative powers. Legislation in the area of education falls under the remit of the Länder; in addition, the Federation no longer has the power to legislate in matters of social housing since the first round of federal reforms in 2006. Furthermore, the prerequisites for granting financial assistance under Article 104b paragraph (1) of the Basic Law do not apply in these exceptional cases.

The Federation is barred from providing full financing for financial assistance measures under Articles 104b, 104c and 104d of the Basic Law. Rather, it can provide only co-financing. This is because the investments concerned pertain to functions that are in the remit of the Länder, and according to the general rules on burden-sharing, the responsibility for (a) functions and (b) costs should not be completely decoupled. In addition, the new constitutional rules stipulate that - for financing arrangements that take effect after 31 December 2019 - federal financial assistance can be provided only in addition to the own funds provided by the Länder (see Article 104b paragraph (2) sentence 5 of the Basic Law). This gives constitutional status to a key concern of the Bundestag, which wanted to ensure that federal financial assistance does not simply replace investment by the Länder. Financial assistance may be granted on a temporary basis only and must be reviewed at regular intervals. Furthermore, annual payments of financial assistance should decrease over time. These conditions were waived for financial assistance to boost investment in social housing (Article 104d of the Basic Law); this provides the Federation with the constitutional authority to contribute to the long-term, sustained construction of social housing by using the instrument of financial assistance in accordance with budget law.

Furthermore, the Bundestag, federal government and Bundesrat may request information on the implementation of measures and the results achieved, which makes it possible to monitor performance towards specific funding objectives.

The type, scope and objective of a financial assistance measure must be laid down in (a) a federal law requiring Bundesrat consent or (b) an administrative agreement with all of the affected Länder on the basis of the Federal Budget Act (*Bundeshaushaltsgesetz*). Such a law or administrative agreement must stipulate the main conditions for granting the assistance. This includes, in particular, the types of investment to be funded, the amount of the Federation's contribution, and the distribution of assistance among the Länder. If criteria are established for the design of Länder programmes, such criteria are specified in agreement with the Länder concerned.

To ensure that funds are used appropriately, the federal government can require the submission of reports and documents and can conduct inquiries at all public authorities. However, the federal government has only limited powers of oversight when it comes to financial assistance granted for the purpose of boosting investment in local education infrastructure on the basis of Article 104c of the Basic Law; this is because education policy falls under the remit of the Länder. The federal government can request only reports in this area and, where circumstances warrant, the submission of documents (Article 104c sentence 3 of the Basic Law). It does not have the power to conduct inquiries at all public authorities.

2.2.3 Laws granting cash benefits

Federal laws that grant cash benefits and that are executed by the Länder (Article 104a paragraph (3) sentence 1 of the Basic Law) constitute another exception to regular burden-sharing rules. If, within the framework of its legislative powers, the Federation pays cash benefits from public funds to private individuals without consideration in return (e.g., for reasons of social policy), the Basic Law allows the Federation to bear all or part of the expenditure. Examples here include:

- the Federal Training Assistance Act (Bundesausbildungsförderungsgesetz) (100% federal funding)
- the Housing Benefit Act (Wohngeldgesetz) (50% federal funding, 50% Länder funding)
- the Federal Parental Benefit and Parental Leave Act (Gesetz zum Elterngeld und zur Elternzeit) (100% federal funding)
- the Advance Maintenance Payments Act (Unterhaltsvorschussgesetz)
 (40% federal funding, 60% Länder funding).

2.2.4 Other special burden-sharing rules

The Basic Law provides for further exceptions to the burden-sharing principle in addition to the provisions cited above. This includes cases in which the Länder execute federal laws on the Federation's behalf. In these cases, the Federation alone pays for the purpose-related expenditures resulting from execution of the law (cf. Article 104a paragraph (2) of the Basic Law). The cost burden borne by the Federation in such cases is justified by the greater influence it has when delegating tasks to the Länder.

With some exceptions, the Federation also bears the costs of (a) occupation and other internal and external costs resulting from the Second World War (Article 120, paragraph (1) sentence 1 of the Basic Law) and (b) subsidies needed to cover social security costs, including unemployment insurance (cf. Article 120 paragraph (1) sentence 4 of the Basic Law).

In contrast, if Germany bears costs for any violations of obligations resulting from supranational or international law, these costs are shared by the Federation and Länder in accordance with the domestic allocation of competences and responsibilities (Article 104a paragraph (6) of the Basic Law). Burden-sharing here follows the principle that the costs are borne by the originator.

Costs arising from sanctions imposed by the European Community for any breaches of budgetary discipline prescribed by Article 126 of the Treaty on the Functioning of the European Union are to be shared by the Federation and Länder at a ratio of 65% to 35%, respectively (cf. Article 109 paragraph (5) of the Basic Law).

2.3 Overview of Federation/Länder co-financing arrangements

	Federal	budget
	2021 Actual	2022 Target
	- (in €	ibn) -*)
1. Joint tasks (Article 91a of the Basic Law)	1.6	2.0
Breakdown:		
1.1 Regional economic structures	0.6	0.7
1.2 Agricultural structures and coastal protection	1.0	1.3
2. Cooperation to support research (Article 91b (1) of the Basic Law)	11.2	11.5
Breakdown:		
2.1 Major research facilities	3.5	3.6
2.2 Other research facilities (Wissenschaftsgemeinschaft Gottfried Wilhelm Leibniz e.V.)	0.8	0.8
2.3 Other research support	6.8	7.0
3. Assessing the performance of the German education system in comparison with other countries (Article 91b (2) of the Basic Law)	0.1	0.1
4. Laws granting cash benefits (Article 104a (3) of the Basic Law)	31.5	32.7
Breakdown:		
4.1 Federal student aid	1.9	2.3
4.2 Housing benefit	0.7	0.9
4.3 Parental benefit**)	7.5	7.7
4.4 Advance on child maintenance to single parents	1.0	1.0
4.5 Federation's contribution to housing and heating benefits	10.1	9.8
4.6 Federation's contribution to basic income support for older people and for people with reduced earning capacity	7.9	8.4
4.7 Other	2.4	2.6
5. Fiscal assistance (Article 104b. 104c and 104d of the Basic Law)	1.2	3.4
Breakdown:		
5.1 Social housing	0.4	0.8
5.2 Urban development	0.8	1.0
5.3 Railway infrastructure for public transport	0.2	0.6
5.4 Other fiscal assistance	0.1	1.8

^{*)} Discrepancies due to rounding

Note: Co-financing does not include the earmarked payments that the Federation makes to the Länder under Article 13 of the Act Accompanying Federal Reforms (Föderalismusreform-Begleitgesetz) to compensate for federal funding that was discontinued with effect from 2007. It also does not include the federal special funds that are managed separately from the federal budget.

^{**)} Financed entirely by the Federation

3. The German tax system and the distribution of tax revenue between the Federation, Länder and local authorities

3.1 Overview of the system for distributing tax revenue

3.1.1 Vertical distribution

Assignment of revenue under the system of "separate apportionment" – i.e. where revenue is apportioned to a single government level (Article 106 of the Basic Law):

Federal taxes

(e.g. excise duties (excluding beer duty), insurance tax, and the surtax on income tax and corporation tax)

Länder taxes

(e.g. inheritance tax, beer duty and gaming casinos levy)

Local authority taxes

(e.g. trade tax and real property tax)

Assignment of revenue under the system of shared apportionment (joint taxes):

Income tax

(including wages tax)

- Federation: 42.5%,
- Länder: 42.5%,
- local authorities: 15%

(Article 106 paragraph (3) of the Basic Law in conjunction with section 1 of the Local Authority Finance Reform Act)

Final withholding tax on interest and capital gains

- Federation: 44%
- Länder: 44%
- local authorities: 12%

Corporation tax

- Federation: 50%
- Länder: 50%

(Article 106 paragraph (3) of the Basic Law)

Value added tax

1995

- Federation: 56%
- Länder: 44%

2000

- Federation: approx. 52%
- Länder: approx. 45.9%
- local authorities: approx. 2.1%

2005

- Federation: 53.1%
- Länder: approx. 44.8%
- local authorities: approx. 2.1%

2010

- Federation: approx. 53.2%

- Länder: approx. 44.8%

- local authorities: approx. 2.0%

2011

- Federation: approx. 53.9%

– Länder: approx. 44.1%

- local authorities: approx. 2.0%

2012

- Federation: approx. 53.4%

- Länder: approx. 44.6%

- local authorities: approx. 2.0%

2013

- Federation: approx. 53.4%

- Länder: approx. 44.6%

- local authorities: approx. 2.0%

2014

- Federation: approx. 53.5%

- Länder: approx. 44.5%

- local authorities: approx. 2.0%

2015

- Federation: approx. 52.3%

- Länder: approx. 45.5%

- local authorities: approx. 2.2%

2016

- Federation: approx. 49.4%

- Länder: approx. 48.3%

- local authorities: approx. 2.2%

2017

- Federation: approx. 50.7%

- Länder: approx. 47.2%

- local authorities: approx. 2.7%

2018

- Federation: approx. 49.6%

- Länder: approx. 47.2%

- local authorities: approx. 3.2%

2019

- Federation: approx. 48.9%

- Länder: approx. 47.7%

- local authorities: approx. 3.4%

2020

- Federation: approx. 43.0%

- Länder: approx. 52.9%

- local authorities: approx. 4.1%

2021

- Federation: approx. 45.1%

- Länder: approx. 51.2%

- local authorities: approx. 3.7%

(Article 106 paragraph (3) and paragraph (4) of the Basic Law in conjunction with section 1 of the Fiscal Equalisation Act)

3.1.2 Horizontal distribution

- Basic principle: distribution reflects local revenue.
- Wages tax is apportioned according to the principle of residency.
- Corporation tax is apportioned according to place of business.
- The final withholding tax on interest and capital gains is apportioned based on bank information stating the Länder in which taxpayers reside or have their registered office.

(Article 107 paragraph (1) of the Basic Law in conjunction with the Tax Revenue Reallocation Act)

Horizontal distribution of VAT revenue among the Länder

- In general, VAT revenue is distributed on a per capita basis.
- However, Länder with below-average tax revenue receive a higher share of VAT revenue, while Länder with above-average tax revenue receive a lower share.

3.2 Cash revenues from federal, Länder and local authority taxes (2014–2021)*

3.2.1 Cash revenues from federal, Länder and local authority taxes (2014-2021)*

¹ Net amount after deducting transfers of VAT and GNI own resources to the EU and (up to 1994) supplementary grants to the Länder; excluding payments from the Länder for the German Unity Fund.

² Supplementary grants to the Länder (up to 1994) added; payments to the Federation for the German Unity Fund not deducted.

4. Budgetary performance in the Länder 2011–2021

The following tables provide an overview of final budget figures for the Länder from 2011¹ to 2021, the most recent year for which actual figures are available. These figures possess only limited comparability due to differences in how functions are distributed between a Land and its local authorities. For this reason, additional tables are provided that show financial data for the Länder including their local authorities. Moreover, it is necessary to bear in mind that, to varying degrees in the respective Länder, tasks can also be performed by independent providers. This can also lead to distortions when comparing the Länder.

The first table, an overview of total Länder expenditure, is followed by tables covering the most important spending categories – human resources, investment and interest payments. These are followed by overviews of the revenues, deficits and debt levels of the Länder.

In order to compare individual Länder of varying sizes, the individual spending categories are also shown in euros per capita.

¹ The data from 1991 to 2010 is available in previous editions of this report.

5. Fiscal equalisation between different government levels

5.1 VAT revenue distribution in accordance with Article 106 paragraphs (3) and (4) of the Basic Law

The distribution of VAT revenue between the Federation and Länder is based on Article 106 paragraphs (3) and (4) of the Basic Law. These provisions lay down the basic principle for distributing VAT revenue, which is that the Federation and Länder are equally entitled to cover their necessary expenditures using current revenues.

The coverage ratio is the mathematical ratio between revenue and expenditure. Calculations of Länder coverage ratios take local authorities into account, with an adjustment made for financial flows between the Länder and their local authorities (especially measures to equalise local authority finances).

5.2 Coverage ratios of the Federation and Länder (including local authorities) 2005–2021

Year		Federation		Lä	inder/local authoriti	es

^{*)} Including seigniorage

5.3 Brief overview of the fiscal equalisation system in Germany

Article 107 of the Basic Law in conjunction with the Fiscal Equalisation Act stipulates that the Länder share of VAT revenue be distributed in a way that balances the fiscal capacities of the Länder. In principle, each Land's share of VAT revenue is based on its number of inhabitants. In deviation from this general rule, Länder with below-average fiscal capacities receive top-ups, and Länder with above-average capacities must accept reductions. The sum of top-ups equals the sum of reductions, since both are calculated using a linear schedule that covers 63% of the gap (positive or negative) between a Land's tax revenue and the Länder average.

5.3.1 Fiscal capacity index

The fiscal capacity index is the sum of:

- a given Land's tax revenue (less 12% of that Land's above-average increase in per capita tax revenue [excluding VAT] over the previous year compared with other Länder), including its per capita share of VAT;
- 33% of that Land's revenue from the natural resources tax; and
- that Land's local authority tax revenue.

This amount is set at 75% of local authority shares of income tax revenue (including final withholding tax on interest and capital gains) and VAT revenue as well as 75% of revenue from non-personal taxes, i.e. trade tax and real property tax (using multipliers that are standardised for the entire country). Trade tax revenue is corrected for the portion of the revenue that local authorities pass on to the Federation and Länder.

5.3.2 Equalisation index

The equalisation index is used as a measure for the fiscal needs of a Land and is the sum of:

- the index for equalising revenue from Länder taxes
 - average revenue collected by all Länder, apportioned to each Land on a per capita basis
 - the populations of the city-states of Berlin, Bremen and Hamburg are weighted at 135% each

and

- the index for equalising local authority tax revenue
 - average revenue collected by all Länder from local authority taxes, apportioned to each Land on a per capita basis
 - the populations of the city-states of Berlin, Bremen and Hamburg are weighted at 135% each, and the populations of the Länder Mecklenburg-Western Pomerania, Brandenburg and Saxony-Anhalt are weighted at 105%, 103% and 102%, respectively.

5.3.3 Supplementary federal grants to Länder with below-average fiscal capacity

After fiscal equalisation among the Länder has been carried out, the federal budget provides general supplementary grants to cover part of the remaining gap between the fiscal capacity and equalisation indices for those Länder with below-average capacity. These general grants cover 80% of the gap between the fiscal capacity index and 99.75% of the equalisation index.

In addition, supplementary federal grants for special needs are received by:

- the new Länder (excluding Berlin) to cover the costs associated with high unemployment benefits (in connection with Hartz IV benefit reforms); these grants totalled €1.0 billion per year until 2011, ca. €0.7 billion per year in 2012 and 2013, ca. €0.8 billion per year from 2014 until 2016, ca. €0.5 billion per year from 2017 until 2019, ca. €0.3 billion per year in 2020 and 2021).
- 10 smaller Länder with below-average fiscal capacity, to offset "disproportionately high administrative costs" (total volume ca. €0.5 billion per year until 2019, ca. €0.6 billion per year since 2020).
- Länder with below-average local authority tax revenues receive an additional 53.5% of the gap between their per-capita local tax revenues and 80% of the average local tax revenues collected nationwide.
- Länder that receive a below-average allocation of federal research grants (Article 91b of the Basic Law) in the year preceding the equalisation year by seven years receive an additional federal grant amounting to 35% of the difference between the per capita research funding already provided under Article 91b of the Basic Law and 95% of average per capita research funding nationwide. These grants are not earmarked and so do not specifically promote research funding.

- 5.4 Data on the horizontal distribution of VAT revenue, fiscal equalisation among the Länder, and supplementary federal grants
- a) Länder tax revenue

[Länder shares of income and corporation tax revenue plus revenue from Länder taxes]

- b) Länder shares of VAT revenue
- c) Länder fiscal capacity prior to equalisation
- d) Deductions (-) and top-ups (+) under the equalisation scheme
- e) Länder fiscal capacity after equalisation of Länder finances
- f) Supplementary federal grants
- g) Fiscal capacity after equalisation plus (i) general supplementary federal grants and (ii) supplementary federal grants for local authorities with low revenue-generating capacity

6. Finances of local authorities and associations of local authorities

6.1 Local authority tax revenue

■ Since 1949

- Länder have the option to share their tax revenue with local authorities in accordance with the legislation that applies in the respective Land
 - Real property tax A and B
 - · Trade tax (earnings, capital, payroll)
 - · Income tax
 - Corporation tax
 - Net worth tax
 - Inheritance tax
 - Transaction taxes (excluding VAT and transport tax)
 - Beer duty
 - · Local excise taxes

■ Changes since 1958

- Revenue from real property tax is allocated to local authorities.
- Revenue from trade tax is allocated to local authorities.
- The Länder are required to share income tax and corporation tax revenue with local authorities in accordance with the legislation that applies in the respective Land.
- The Länder have the option to share the revenue from other Land taxes with local authorities in accordance with the legislation that applies in the respective Land.

Changes since 1970

- 14% of income tax revenue is allocated directly to local authorities.
- Local authorities are required to distribute part of the revenue from trade tax to the Federation and Länder (called "trade tax apportionment"; half goes to the Federation and half to the Länder).
- Revenues from local excise duties are allocated to local authorities.
- With the recategorisation of VAT as a joint tax, the Länder are additionally required to share VAT revenue with local authorities in accordance with the legislation that applies in the respective Land.

■ Changes since 1980

- Payroll tax is eliminated.
- Local authorities' share of income tax revenue is raised to 15%.

■ Changes since 1993

• 12% of interest income deduction is allocated directly to local authorities.

■ Changes since 1998

- Trade tax on business capital is eliminated.
- As compensation, 2.2% of the Federation's VAT revenue (following upfront deductions) is allocated directly to local authorities.

■ Changes since 2009

 12% of revenue from those components of the final withholding tax that were previously subsumed under the interest income deduction is allocated directly to local authorities.

■ Changes since 2015

 In addition to this direct allocation, local authorities are also assigned a fixed amount of VAT revenue.¹

■ Changes since 2020

 The upfront deductions for the Federation in the vertical distribution of VAT are abolished; instead, the percentage of total VAT revenue allocated directly to local authorities is adjusted to around 2% (revenue neutral adjustment).

Current state of play as of 2022

- Local authorities have the authority to collect non-personal taxes (real property tax A and B, trade tax).
- Local authorities are required to pay a trade tax apportionment to the Federation and Länder (multiplier Federation: 14.5%, multiplier Länder: 20.5%)²
- 15% of wages tax and assessed income tax revenue is allocated directly to local authorities.
- 12% of revenue from capital income tax pursuant to section 43 (1) sentence 1 nos 5 to 7 and 8 to 12 and sentence 2 of the Income Tax Act (Einkommensteuergesetz) is allocated directly to local authorities.
 - 1 This fixed amount was introduced in connection with, and in advance of, the €5 billion in fiscal relief provided to local authorities starting in 2018. The amount has been changed many times since then; the annual changes are not listed separately here.
 - 2 Due to their high number, the many changes to the apportionment of trade tax revenue are not detailed here.

- Around 2% of VAT revenue is allocated directly to local authorities, plus a fixed amount of €2.4 billion.
- The Länder are required to share income tax, corporation tax and VAT revenue with local authorities in accordance with the legislation that applies in the respective Land.
- The Länder have the option to share the revenue from other Land taxes with local authorities in accordance with the legislation that applies in the respective Land.
- Local authorities have the authority to collect local excise duties.

6.2 Local authority budgets: an overview

Legal basis

The main provisions governing the planning, structure, execution and accounting of local authority budgets are set out in local authority codes and constitutions enacted at Land level. The specific details of these tasks are regulated in ordinances enacted by the interior ministries of the Länder. The most important of these ordinances in terms of local authority budget management is the Local Authority Budget Ordinance (Gemeindehaushaltsverordnung). This ordinance stipulates, among other things, how budgets are to be structured. Other ordinances regulate areas such as cash management (which is regulated by the Local Authority Cash Management Ordinance or Gemeindekassenverordnung) and the management of local authority undertakings (which is regulated by the Local Authority Undertakings Ordinance or Eigenbetriebsverordnung). Local authority budget management is executed on the basis of budget by-laws that must be adopted anew by local authorities every year. In local authorities using a cash-based accounting system (called Kameralistik in German), such by-laws establish the budget proper, the ceiling for short-term borrowing, and tax rates. Local authorities using an accrual accounting system (called Doppik in German) include in their budget by-laws estimated revenue, cash receipts, expenses, cash payments and commitment appropriations.

Budgetary principles

The principles that apply to budget management by local authorities conform largely to those that apply to the Federation and the Länder and are set out in local authority codes.

Unlike the Federation and the Länder, however, local authorities are bound by special rules that govern the raising of revenue. Under these rules,

the revenues needed to fulfil local authority functions are to be generated firstly by means of special charges (such as administrative fees, usage fees, and contributions for public infrastructure), to the extent that this is reasonable and necessary, for services provided by the local authority. Thereafter, these functions are to be financed by taxes insofar as the other sources of revenue (including transfers from reserves, cost reimbursements and general fiscal grants from the Länder) do not suffice. As a last recourse, funds may be obtained by borrowing only if they cannot be obtained in any other way or if other methods of financing would prove uneconomical.

Cash-based budgeting system

Local authority budgets are divided into an administrative budget and a capital budget. This is different from the single budgets used by the Federation and the respective Länder. The capital budget shows the revenue and expenditure affecting capital formation (including investment expenditure, new loans and loan repayments), while the other payment flows that do not affect capital formation are included in the administrative budget. As a rule, excess revenues in the administrative budget are transferred to the capital budget and used there, among other things, to finance investments.

New local authority accounting systems

The "Blueprint for reforming local authority budget legislation", which was adopted on 11 June 1999 by the standing conference of interior ministers and senators of the Länder, provided for the introduction of an accrual-based budgeting and accounting system (based on double-entry bookkeeping) in addition to a reformed cash-based budgeting and accounting system. The blueprint's main aims were:

 to foster the use of commercial instruments and methods

- to treat administrative services as outputs/ products, which can then serve as the basis for target-setting and for the calculation and allocation of costs
- to ensure the documentation of all resources used in connection with the provision of services
- to develop a new way of documenting planned revenues and expenditures in accordance with the principles of "decentralised responsibility for resources", for example in the form of a budget
- to promote greater decentralisation of resource management
- to develop cost and quality indicators for administrative services, to be used as benchmarks by managers
- to require reports (including mid-year reports) on the achievement of performance targets, to be used as a controlling/ management instrument to support both decentralised resource management within the administration as well as accountability to the local authority council
- to ensure overall documentation of resources generated and consumed, as well as assets and capital (i.e. in the form of a consolidated fiscal statement).

The main idea behind the blueprint was to enable local authorities to switch from (i) a cash-based approach to budgeting and accounting that mainly documents the management of revenues and expenditures to (ii) a resource-based approach that documents the generation and consumption of all resources needed to provide administrative services. These aims were realised in two ways:

 by revising legislation governing cash-based budgeting, and by drawing up new budgetary legislation geared towards accrual accounting.

Accrual accounting now incorporates depreciations, the drawing up of annual fiscal statements, and the recording and valuation of total assets and liabilities (including pension reserves) into local authority budget management. At the same time, it also ties in with the tradition of public budget legislation (budget principles, the budgetary powers of the local authority council, the budgetary plan and the principle of annuality).

In all of the Länder excluding the city-states of Berlin, Bremen and Hamburg, legislation adopting accrual-based budgeting and accounting has been in effect since the start of the 2009 fiscal year. The transition periods vary between the different Länder, ranging from two years (in North Rhine-Westphalia and Rhineland-Palatinate) to thirteen years (in Baden-Württemberg), starting in 2007. Ten of the 13 non-city-state Länder permit accrual-based budgeting and accounting only. Schleswig-Holstein allows its local authorities to choose between accrual accounting and modified cash accounting. Departing from the Conference of Interior Ministers' decision on the reform of local authority budget law, Bavaria and Thuringia have retained the cash-based accounting system but also allow their local authorities to introduce accrual accounting on a voluntary basis.

A wide variety of solutions were found for the introduction of accrual accounting. The systems, underlying legislation, forms of documentation, and definitions of concepts adopted by the Länder differ considerably. This makes it difficult to conduct nationwide comparisons of local authorities.

The main characteristics of accrual-based budgeting and accounting systems are as follows:

Budgets structured by product area

Under the new system, budgeting and accounting are structured according to product area. Products are pooled into product groups, which are then assigned to product areas.

Budget plan

The main components of accrual-based budgets are the fiscal plan and the operating results plan. The fiscal plan contains planned cash receipts and payments, i.e., all transactions that affect the cash position. The operating results plan contains estimates of expenses and revenue, regardless of whether they affect the cash position.

Partial fiscal plans

In addition, partial fiscal plans are to be drawn up for individual product areas or for products that are allocated to a superordinate organisational area.

■ Tripartite accounting

In most Länder, local authorities are required to keep three sets of accounting figures: a balance sheet, a statement of operating results (i.e., a profit and loss statement) and a cash flow statement.

Budgeting process

The budgeting process aims to decentralise fiscal responsibility and to facilitate a more flexible management of resources. Within the framework of defined tasks or agreed targets, administrative areas are allocated fiscal resources that they manage largely on their own.

Budgeting pursues the following objectives:

- to strengthen cost-consciousness
- to identify potential for improvement
- to enhance motivation

Output-oriented budgeting

Output-oriented budgeting systematically combines decentralised fiscal responsibility with performance targets. Combined resource and performance criteria serve to guide administrative action. This requires a well-developed cost accounting system that provides the necessary data to plan product budgets and to control service provision.

Cost accounting

Most Länder regulations recommend or even require the introduction of cost accounting systems. However, these regulations do not contain specific instructions on how such systems should be designed. Important areas where cost accounting is used include the calculation of fees, the determination of budget information, and internal cost allocation.

6.3 System for equalising local authority finances

Municipalities have access to a wide variety of revenue sources. However, individual local authorities often face considerable differences in their fiscal circumstances, even when they are of a similar size and have similar responsibilities. To ensure that local authority functions (particularly services of general interest) are adequately financed, a system for equalising local authority finances at the Land level is needed to supplement other sources of local authority revenue, especially local tax revenues. This provides for fiscal equalisation in several ways.

First, the fiscal equalisation system serves the purpose of guaranteeing all local authorities in a given Land a minimum level of fiscal resources, taking into account the average magnitude of tasks they must fulfil (this is the vertical, quantitative dimension of the fiscal equalisation system). Second, it serves the purpose of evening out differences in the fiscal capacity of individual local authorities (this is the horizontal, redistributive dimension of the system). This entails reducing only the structurally related fiscal differences between local authorities, and not those for which they are themselves responsible. Thus financially weak local authorities generally receive proportionally more funding than those with stronger sources of tax revenue.

Accordingly, the **vertical dimension** of the system for equalising local authority finances involves determining the total amount of fiscal resources to be allocated to the local authority level. This total amount (known as the *Finanzausgleichsmasse*) is then distributed among the individual local authorities based on their needs (**horizontal dimension**). The vertical and horizontal distribution of the funds among the local authorities is the responsibility of the respective Land. The guiding principle is that the distributed funds should cover fiscal needs.

The system for equalising local authority finances has been anchored in Article 106 paragraph (7) of the Basic Law since 1956. Under Article 106 paragraph (7) sentence (1) of the Basic Law, a certain

percentage (set by the Land legislator) of the Länder share of revenues from joint taxes is passed on to the local authorities and associations of local authorities (obligatory revenue-sharing). The exact percentage is set by the Länder legislatures themselves and differs depending on how functions are distributed between a Land and its local authorities. Besides the obligatory revenue-sharing prescribed by law, Land legislatures can also decide whether, and at what percentage, to contribute additional Land revenues to the total amount to be distributed (this is referred to as "optional revenue-sharing"). Länder policies in this area vary as well.

There are two basic systems for determining the total amount of fiscal resources to be allocated to the local authority level (the vertical dimension of fiscal equalisation): the percentage-based system and the needs-based system. The percentage-based system guarantees local authorities a fixed percentage of the Länder share of revenue from joint taxes and other Land revenues every year. The needsbased approach, on the other hand, calculates the financing needed to carry out local authority functions, whereby the main criteria for determining the total amount are the concrete fiscal needs of local authorities. With this approach, the percentage of the share of tax revenue that is passed on to the local authority level is determined indirectly. In practice, there are various "mixed" models combining these two approaches. Fixed amounts are also set for specific periods of time.

The total amount is distributed among the individual local authorities (the horizontal dimension of fiscal equalisation) above all via formula-based allocations of funds (resources to cover general expenditures without being earmarked for a specific purpose). For this purpose, every local authority's fiscal capacity is assessed against its fiscal needs. Determining the fiscal needs of the individual local authorities is one of the most difficult aspects of the fiscal equalisation process. To be able to calculate the fiscal needs precisely, it would be necessary to define the functions of each local authority and to calculate the exact costs associated with carrying out each of these functions. This would require

the specification of uniform standards for facilities, equipment, services, etc. - a process that would have to take place at the political level. Following such a procedure to calculate fiscal needs would go against the principle of local self-governance because it would not permit varying local conditions and local policy decisions to be taken into account. Therefore, all of the Länder use a standardised procedure to map out the fiscal needs of individual local authorities. This involves the use of various "apportionment factors" – referred to as main apportionment factors, secondary apportionment factors, and supplementary apportionment factors - that take into account important local and function-specific fiscal needs of local authorities in a standardised way. These individual factors add up to a "total apportionment factor" which is decisive for determining the formula-based allocation of funds.

The core component of the total apportionment factor is the main apportionment factor, which is based on a local authority's number of inhabitants (and, in some cases, the degree to which a local authority functions as a "centre" for surrounding areas), which is the most important criterion for calculating its fiscal needs. In this context, most Länder proceed from the assumption that a local authority's fiscal needs rise disproportionately in relation to the size of its population; as a result, populations are weighted differently depending on size. The assumption that fiscal needs rise progressively is largely based on the fact that larger local authorities, in their function as "centres", provide services not only for their own inhabitants but also for the inhabitants of surrounding areas. Other Länder follow a "centre"-based approach whereby the number of inhabitants is weighted more strongly (or special fiscal allocations are provided) for local authorities designated as functional "centres" according to regional development plans.

Supplementary apportionment factors serve as an additional basis for differentiating fiscal needs. These factors (which generally lead to a stronger weighting of the number of inhabitants and hence greater financing) are designed to capture characteristics that increase a local authority's fiscal needs based on specific local functions, features or circumstances. Individual Land legislatures have made varied use of the option to introduce supplementary apportionment factors as a way to account for specific local characteristics that affect a local authority's fiscal needs (for example, various Länder have introduced supplementary apportionment factors for health resorts, population growth, surface area, schools, social welfare costs, military bases, roads, and the performance of central functions).

Furthermore, the Länder grant their local authorities additional (earmarked) financing from general reserves in the Länder budgets (regulated partly by existing legislation on fiscal equalisation, partly by special legislative provisions and partly by provisions contained in specific budgets).

There are considerable differences between the Länder in how functions are distributed between a Land and its local authorities. It is therefore very difficult to compare the financial grants the individual Länder pay to their local authorities.

6.4 Trends in local authority finances, 2012-2021 (excluding city-states)

6.4.1 Key figures showing budget outcomes for local authorities, 2012 to 2021

Source: Federal Statistical Office: Accounting results for local authority budgets, 2021: cash statistics; statistics on public budget debt.

- 1 Expenditure/revenue after subtracting (a) internal offsetting items and (b) payments by local authorities to other local authorities, excluding cross-period financial transactions balancing the overall budget of an authority. The adjusted expenditure and revenue figures show the spending that was required to perform local authority functions and the revenue that was available to cover this spending.
- 2 Balance of adjusted expenditure and revenue (not taking into account the balance of internal offsetting items).
- 3 Non-public and public borrowing for investment purposes as of 31 December of each respective year.
- 4 Non-public and public cash advances that serve to bridge short-term liquidity shortfalls; figures as of 31 December of each respective year.
- * The cash statistics do not yet provide a final overview of actual revenue and spending outcomes for local authorities and associations of local authorities. Figures that correspond to accrual-based accounting are not available until the annual accounts of local authorities and associations of local authorities have been prepared. As a result, year-on-year comparisons for 2019 are provisional and therefore of limited informational value. According to the Federal Statistical Office, the introduction of accrual accounting by local authorities in individual Länder continues to have an impact on the quality of cash statistics.

6.4.2 Local authority tax revenue (total)
